Cumberland

THE GREAT COLUMBIAN RASPBERRY Hardy and vigorous, often growing eight to ten feet in a season, and standing any degree of frost and drought. The berries are large, dark purple, firm as to texture, with an agreeable, pure, rich flavor, which is brought to its highest flavor when canned or cooked. The most prolific of any sort known, the fruit fairly hanging in masses. A row or hedge of it is a sight to behold. Twelve for \$1.50; 100 for \$8.00.

LUCRETIA The Lucretia is the best of all the dewberries, glossy black, very large, coreless, juicy and sweet. The vine is vigorous and spreads over the ground. Fruit ripens about ten days or two weeks before the Early Harvest blackberry. Price, six for 60 cents; 12 for \$1.00; \$6.00 per 100.

THE NEW YOUNGBERRY

A remarkable new berry which we firmly believe is by far the most promising of all the new things. The berries are about an inch long, dark purple color with a delicious flavor. The plants are very productive and begin bearing the first year after planting. Another characteristic of the Youngberry is its adaptability to all and any kind of soil.

Plants should be set in rows seven feet apart with the plants nine feet apart in the rows. Raise them as you would a Dewberry as to posts and wire if you do not want them on the ground. The Youngberry is a remarkable grower, so fertilize it well. Oftentimes a vine will grow from 15 to 24 feet in one year. Don't prune Youngberries the first year, allow all the wood to mature even if they get 12 to 20 feet long. Put up on trellis or wire. Just prior to picking would advise cutting off all new growth to about a length of 8 inches. This makes picking easier and these stubs will produce all the wood needed for the next year's crop. Price of Youngberry Plants, 12 for \$1.50; 25 for \$2.75; 100 for \$10.00.

Raspberries

LATHAM This remarkable and very desirable new variety is certified absolutely mosaic-free, and acceptable anywhere. Latham is perfectly hardy, withstanding Manitoba winters without protection. ST. REGIS Everbearing Red Raspberry. Fruit commences to ripen with the earliest and continuing on young canes until October, many quarts often being picked after the first snow falls. We are just as anxious as you are to ship them promptly but often conditions are not so favorable as you might think.

MASTODON EVERBEARING STRAWBERRY

Unlike other Everbearers, the plants of the Mastodon are large, vigorous, heavily crowned and deep rooted. This explains their ability to produce enormous loads of fine fruit. Every plant produces heavily; also the runner plants; in fact, it is a true everbearer and the only one that will produce a paying crop of berries the same season it is planted.

HARDY PERENNIALS

AQUILEGIAS OR COLUMBINES

The Columbines are among the most elegant and beautiful hardy plants, producing their graceful spurred flowers on stems rising 2 feet or more above the beautifully divided foliage, and should be planted wherever their presence will serve to lighten up a too stiff and formal planting, for no other plant has so airy a grace as the Columbine, is more generous of its blooms, or more effectively adapted for cut flowers.

They are not at all particular as to soil or location although they prefer a sandy loam and a moist but well drained sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late spring and early summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned garden flowers.

PHILO- DENDRON

The WONDER VINE

Also known as
Devil's Ivy

We cannot say too much in praise on the value of this vine for use in fern dishes, wall pockets, baskets or any place where anything else will not thrive. It is by far the best plant for use in the home as under-watering, over-watering or any adverse conditions will little affect it. For fern dishes, plant a sufficient quantity in dish and pin the vine to the soil with greening pins and it will root at every joint and form a compact mass of green heart-shaped leaves. Give it a trial and see for yourself. Everyone knows the value of English Ivy in the home, yet the Philodendron surpasses it by far. Price, 25 cents each.

PRESIDENT HERBERT HOOVER

The most wonderful color combination that has ever been produced in any rose. A glorious blending of orange, pink and gold, varying in tone from coppery red in the bud to glowing orange yellow at the base of the petals, flaming and suffused with vivid rose pink. In all stages of bloom, from bud to fully opened flower, it is unusually attractive. It is remarkable for its vigorous growth, healthy, hybrid tea foliage, rigid stems, long pointed buds and free blooming qualities. This fall we only have the two-year plants to offer. **Strong plants that will bloom next spring, \$1.50 each.**
